NEW
PRODUCT

50uA SOD-523 Package Small Signal Zener Diode

Product Introduction

Yangjie Technology has recently launched a series of SOD-523 packaged small-signal voltage stabilizing diodes VZ1.8V~39V@IZT=50uA, featuring ultra-low leakage characteristics (IZT=50uA), specifically designed for high-precision, low-power, and space-constrained electronic systems. It is suitable for application scenarios that are sensitive to leakage current, such as MCU reset, voltage reference, signal clamping, and sensor bias. The product series are applicable to consumer electronics fields such as smart home, wearable devices, IoT modules, and portable power management circuits.

New Product Launch

1. $V_Z @ I_{ZT} = 50\mu A$
2. $V_F(MAX) = 0.95V @ I_F = 10mA$
3. $P_D = 200mW$
4. It is applicable to consumer electronics fields such as smart wearables, IoT modules, smart home and power modules.
